

# The Townsville Hospital Emergency Department Queensland, Australia

## Emergency + Education = MoLIE Registrar

### Commencing: from Mid 2011 onwards, 6 month rotations

Be part of an exciting and dynamic new Intern teaching program while working in a tertiary level Emergency Department in tropical North Queensland!

**MoLIE (More Learning for Interns in Emergency)** is an innovative program providing intensive and dedicated teaching to Interns. The program is case-based with small group teaching including: clinical reasoning, communication and professional skills, hands-on skills, simulation and role-playing. Townsville is one of only a few centres in Queensland that has implemented this new program.

As the MoLIE Registrar, you will become a part of our enthusiastic team of educators. Your duties will include organising and participating in the delivery of small group teaching, supporting the Interns in their clinical work, and assisting in research activities. Half of the position will be clinical duties in the Emergency Department. Here, you can emphasise key teaching points from small group sessions and help incorporate them into the Interns' clinical practice. You will gain invaluable experience and skills in education and have an opportunity to fulfil 4.10 requirements.

**So, if you are interested in Medical Education and Emergency Medicine, look no further! Join us in Townsville, at a friendly tertiary hospital in the tropics.**
